**UX/UI Designer**

elhugoux.framer.website
buenrsotro.h@gmail.com
(331)150-4687

UX/UI designer with experience creating user-centered experiences that optimize usability. Specialized in UX/UI Design, wireframing, prototyping, system design and innovation methodologies such as Design Thinking. Experience in user research, usability testing, responsive design and Mobile-First Design. Focus on the design of digital products for fintech and proptech, achieving improvements in user satisfaction and business results. Leverage AI-powered tools to enhance the end-to-end design process, accelerating UX research, user flows, wireframing, microcopy, functional documentation, and design exploration to enable faster iteration and data-informed decision-making.

## Education

**Bachelor in Design for Graphic Communication**
Universidad de Guadalajara

## Methododologies

- **Cusomer Focus** Harvard Business Publishing 2025
- **Innovation and Creativity** Harvard Business Publishing 2025
- **Amazon Working Backwards** CONTPAQi 2021
- **Design Thinking** CONTPAQi 2020
- **Lego Serious Play** CONTPAQi 2019

## Skills

- **User-Centered Design:** User research, Customer Journey Mapping, usability testing, A/B Testing, Mobile First Design.
- **Design and prototyping tools:** Figma, Adobe XD, Webflow, Framer,, Miro.
- **Design methodologies:** Design Thinking, agile methodologies, Heuristic Evaluation, Interaction Design.
- **Languages:** Intermediate-advanced English (B2 CEFR).

## Professional experience

**UX Designer | Experian (USA)**
Jan. 2025 - Currently

- Transformed a low-maturity Design System by rebuilding over 40% of its components. Established documentation standards, resolved visual inconsistencies, and consolidated a library of more than 70 components in Adobe Experience Manager (AEM), ensuring production alignment while improving scalability, maintainability, and design consistency.
- Collaborated closely with business stakeholders, developers, and Product Owners to align design decisions with product strategy and user needs. Leveraged insights from Hotjar and Adobe Analytics to drive data-informed decisions, prioritize UX improvements, and maximize the impact of product initiatives.
- Optimized the B2B website and corporate blog by improving user interfaces, navigation flows, and visual hierarchy. Applied responsive design principles to deliver a consistent user experience across desktop and mobile devices.
- Participated in Grooming, Backlog Refinement, and Sprint Planning sessions using Jira, refining user stories, defining acceptance criteria, and prioritizing initiatives alongside Product Owners and engineering teams to ensure successful product delivery.

**Product Designer | DD360**
Feb. 2024 - Sep. 2024

- I collaborated with the redesign of the proptech platform: Wiggot, applying Service Design Thinking and Design Systems to improve the usability and efficiency of the product.
- Collaborated in user research (UX Research) and usability testing, resulting in new optimized navigation that reduced search times and increased user satisfaction.
- Together with the team, I developed a centralized design system that improved visual consistency and accelerated product development, achieving efficient collaboration with multidisciplinary teams.
- Implemented a guided interface tour that increased user adoption and retention.

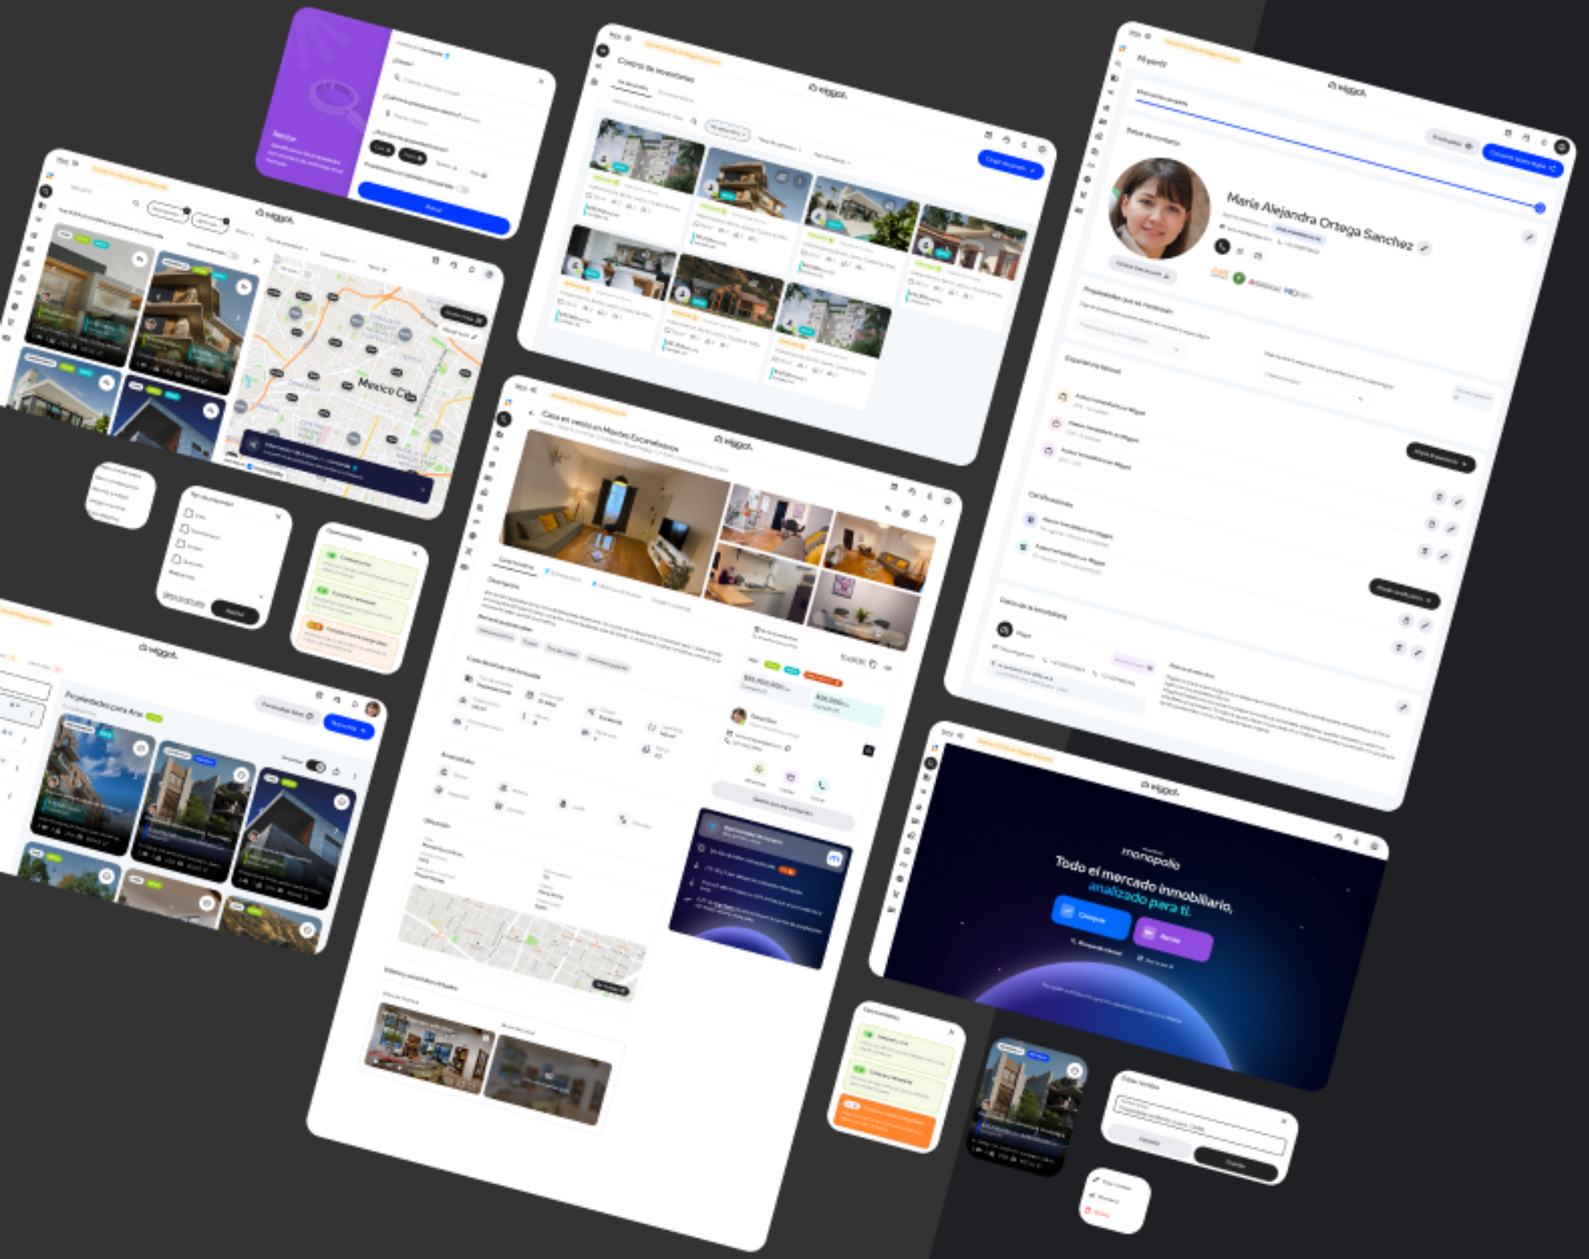

**UX/UI Designer | Wiggot**
Oct. 2023 - Feb. 2024

- I led the design area of Wiggot, applying Service Design Thinking and Design Systems to improve the usability and efficiency of the product.
- I optimized the user experience by creating wireframes and high-fidelity prototypes, validating through user testing.
- Developed usability flows by collaborating closely with stakeholders and product managers, which increased user retention by 25%.
- I implemented new features that improved the user experience in high load situations, and led the coordination of marketing campaigns that boosted sales by 65% during Q2 2024.

I am a UX designer specialized in user-centered solutions for fintech and proptech. I have led projects applying Design Thinking and Service Design, collaborating with multidisciplinary teams to improve the user experience and generate measurable results. My focus on research and validation ensures effective and scalable products.

# Hi, I'm Hugo Buenrostro UX/UI Designer

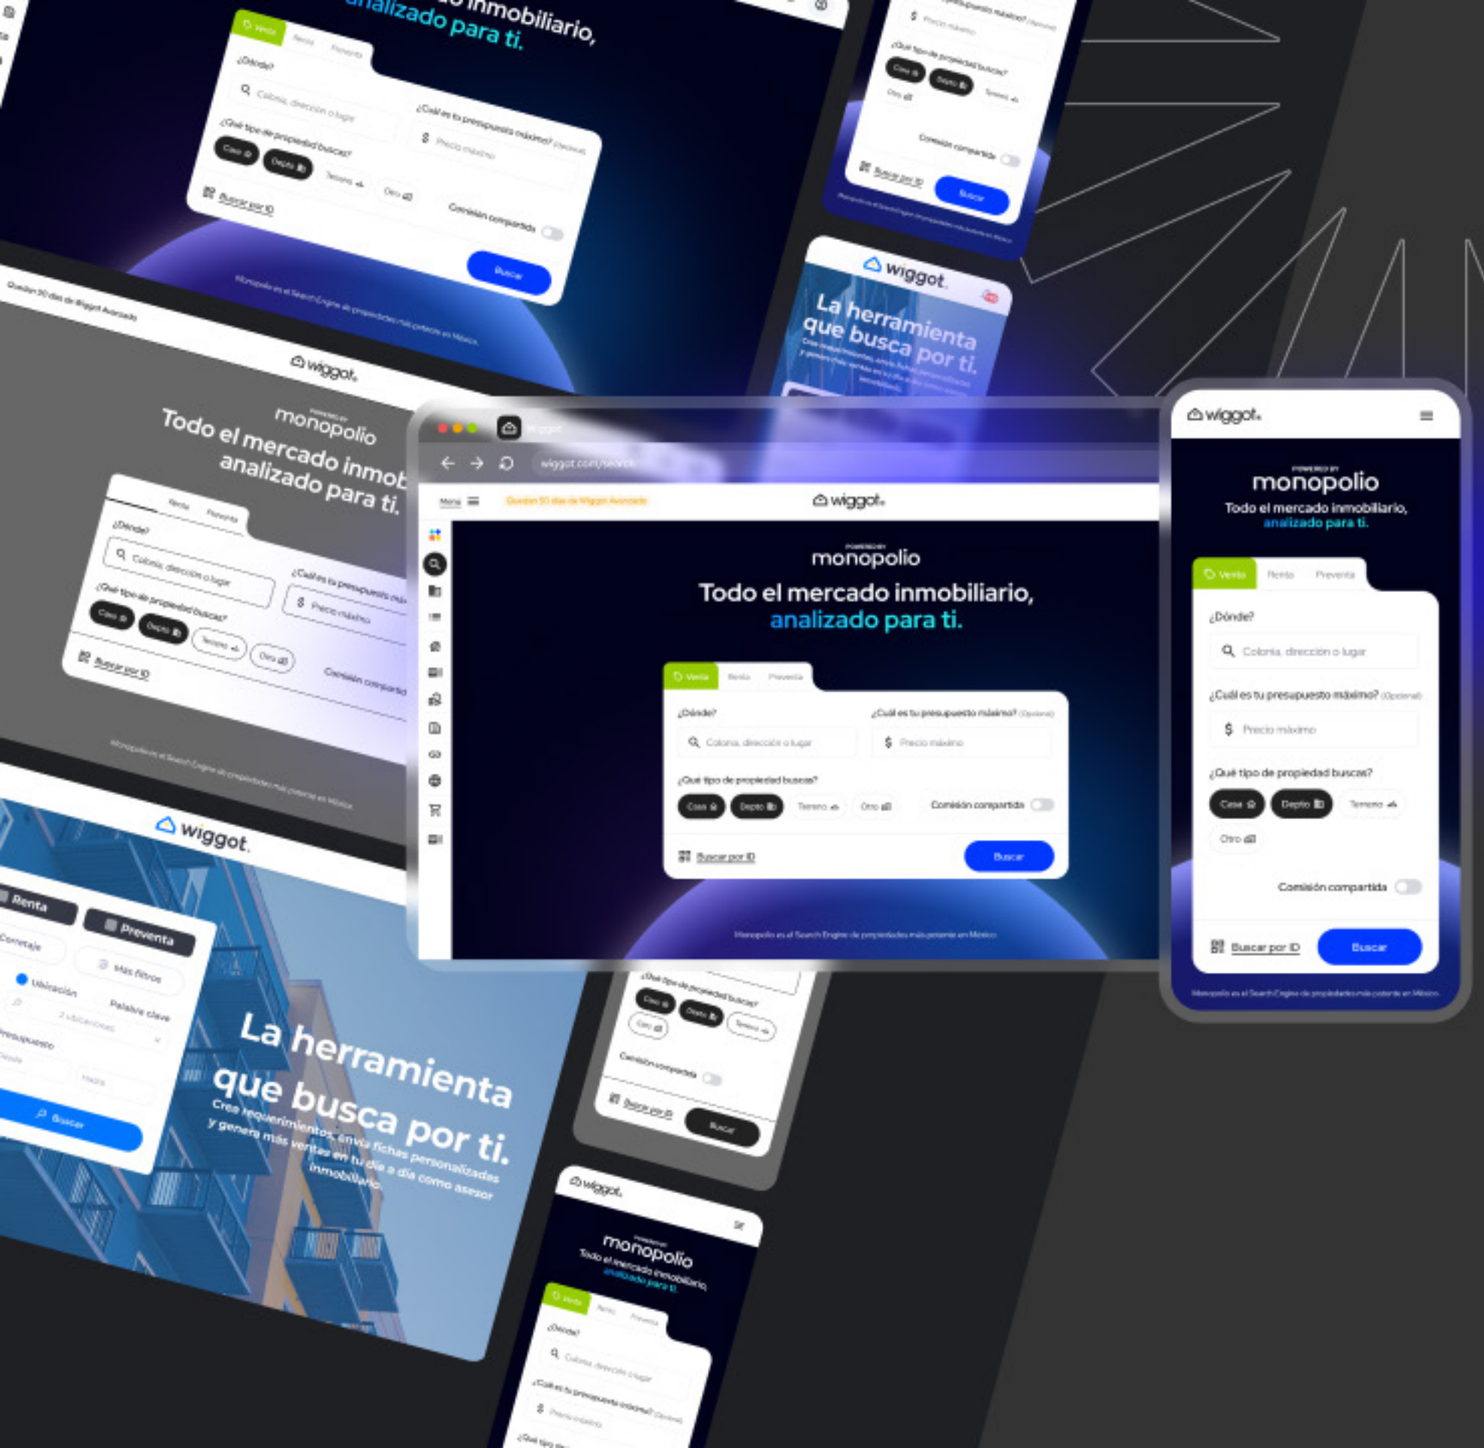

Portafolio | Book

# Wiggot Redesign

Web | Wiggot

Redesign, documentation and testing of the new design system implemented for the platform, standardizing the experience throughout the system. (2024)

# Empréndete Blog

Web | Empréndete Blog
Student accounting blog developed in Webflow, where I create notes of common interest for young entrepreneurs and students.

The project started at the beginning of 2022, creating the brand from scratch and setting up the site, which gives autonomy of control by not depending on a third party to adjust the site.

The inspiration for the blog comes from a book called WTF with the SAT, which touches on tax issues and accountants in a very enjoyable way.

The blog feeds its social networks that managed with Meta Business Suite.

The site is more focused on mobile use than desktop, that's why the use of cards for a friendlier navigation.
(2023)

# Gamification UI

UI/UX | CONTPAQi Connection (2020)
Creation of UI/UX in conjunction with the company video game developer Karaokulta/AMBER.
The flow of the application was jointly developed, as well as the wireframe, character designs, medals, logos, palettes, iconography and the project prototype.

# Convention App

App | Convención CONTPAQi Algarabía (2022)
Sincronía (2023)
This application was created in conjunction with the companyof EvenTwo events who provided us with a CRM where the application was powered from. This is a web application that could be updating at the moment due to needs of the project.

The creation of the interface was handled internally. from the basis provided by the supplier. The application had an agenda section, speakers, sponsors, program, hotel map, photographs and additional information about the event.

Its notifications section made it very useful, for be able to keep the event itinerary in order informing attendees about day-to-day activities, as well as the post-event with flight itineraries and pickup schedules from the hotel, trying to be an application designed for the client.
